

AGRITEC – Rotary hoe AT30/31

Short description of AT30

The **AGRITEC** AT30 rotary hoe is a very important and valuable soil cultivation device in the field of gardening and landscaping.

The **laterally adjustable** rotary hoe of the AT30 series has been specifically developed to be used with municipal and compact tractors of 12–50 hp.

It has rigid and angled cutting blades that are arranged **helically** around the cutter shaft. This ensures an **extremely smooth** running with **minimal** power consumption and produces a clean cut. The cutter shaft is powered by a **maintenance-free** chain in oil bath. An automatic chain adjuster ensures the optimal positioning of the chain. The rear protective cover and the integrated levelling bar, **adjustable** via chain, eliminates the bumhp.

Due to its **side** shifting capacity, the AT30 is also particularly suitable for use in vineyards and orchards. The AT30 rotary hoe has proven its worth in communal establishments and tree nurseries as well.

Model	Operating width	External width	Side shift	Weight	Blade	Power requirement
AT30-140V	140 cm	165 cm	15 cm	270 kg	24	35 – 45 Hp
AT30-160V	160 cm	185 cm	20 cm	290 kg	28	40 – 50Hp
AT30-180V	180 cm	205 cm	25 cm	310 kg	32	45 – 55 Hp
AT30-200V	200 cm	225 cm	30 cm	330 kg	36	50 – 65 Hp
AT30-230V	230 cm	255 cm	35 cm	350 kg	44	55 – 80 Hp

Technical features

- For carrier vehicles of 35–80 hp
- Operating width between 140 cm and 230 cm
- **Manual** side shift
- CAT.1, CAT.2 **rear mounting**
- Working depth adjustable up to **18 cm**
- 4 blades per flange – optional: 6 blades
