

AGRITEC – Scarifier ST40

Short description of ST40

The **AGRITEC** scarifier of the ST40 series has been designed to be used with tractors and carrier vehicles, as well as compact tractors of 15–55 hp.

The ST40 **removes** the **felt layer**, which is formed from dead plant parts. With the **AGRITEC** scarifier ST40 new grass plants will grow, as the roots growing in the width are severed.

Felt damages any type of lawn

- The root growth is inhibited
- The water permeability is reduced
- The oxygen supply to the roots is reduced
- Fungal infections are stimulated
- The shear strength suffers

The **narrow blade spacing** of 2 cm and the **high rotational speed** of the blade shaft ensure a perfect scarification result.

The blades, which are oscillating, are suspended to the shackle.

The working depth is set with **millimeter precision, without tools** and in a **hand grip** via a central spindle.

Perfect in function – extremely quiet– low power demand

Model	Operating width	External width	Weight	Blade	Power requirement
ST40-100F	83 cm	117 cm	217 kg	44	15 – 55 hp
ST40-120F	109 cm	137 cm	233 kg	54	21 – 55 hp
ST40-140F	127 cm	157 cm	250 kg	64	26 – 55 hp
ST40-160F	147 cm	177 cm	266 kg	74	30 – 55 hp
ST40-180F	167 cm	197 cm	284 kg	84	35 – 55 hp

Technical features

- CAT.1 and CAT.1N **rear** mounting/ frontal on request
- Direct mounting
- Working depth is adjustable with **millimeter precision** via the adjustment spindle
- Blade spacing of **2 cm**
- 2 large fixed rear **wheels**
- 2 large **swivel wheels** at the front
- Attention: **2–3 mm scarifying depth**
